1. Within the Rumanian Cabinet Council certain Ministers, who are members of the Central Committee of the Rumanian Communist Party, are responsible for economic sectors of the country. This responsibility is conferred upon them by the Central Committee.
2. An economic sector covers the activity of several ministries (for example production planning is a sector in which all the ministries are interested). But the minister in charge of an economic sector may not negotiate directly with any of the interested ministries. All negotiations have to be conducted through the State Commission organization which comes under the Cabinet Council.
3. [REDACTED] the existence of three State Commissions, but could furnish particulars about only two of them:
  - a. State Planning Commission (Comisiunea de Stat a Planificarii - CSP). No information.
  - b. State Standardization Commission (Comisiunea de Stat a Standardizarii - CSS). In a planned economy it is impossible for the various industries to manufacture the goods they want according to their own specifications. The State Standardization Commission is responsible for planning the products to be manufactured, as well as their quality. For this purpose a set of specifications, called STAS, was fixed, which every factory has to comply with.
  - c. State Supply Commission (Comisiunea de Stat a Aprovizionarii - CSA). Every ministry has a Directorate, which deals with the supply of the factories under its supervision, and which is called the General Directorate for Supply and Distribution (DGAR). In view of the importance of the tasks, which the economic sectors have to fulfill, the CSA has lately been set up. From the time of its inception, the supplies of all ministries have been carried out by the CSA through the respective General Directorate. The general organization of CSA is as follows:
